SUMMARY

Recent Computer Science graduate skilled in full-stack development and data analytics, with experience in building REST APIs using Flask/Django and analyzing data using Python and SQL and dashboards with Google Looker. Familiar with Docker, CI/CD, and database systems. Seeking to contribute to scalable, data-driven applications in a growth-oriented environment.

EDUCATION

- Vellore Institute of Technology**
B.Tech in Computer Science and Engineering; CGPA: 7.22
 - Indira Gandhi Memorial High School**
Class XII (CBSE); Percentage: 79.8%
 - Indira Gandhi Memorial High School**
Class X (CBSE); Percentage: 85.8%
- Vellore, India
Sep 2021 – Nov 2025

Kolkata, India
Mar 2021

Kolkata, India
Mar 2019

SKILLS

- Languages:** C, C++, Python, JavaScript, Java
- Frameworks:** Flask, Django, Django REST Framework
- Backend:** REST APIs, Microservices, Authentication, MVC Architecture
- Databases:** PostgreSQL, MySQL, SQLite, SQL
- Messaging:** Kafka (Basics), Event-driven Architecture
- Testing:** pytest, Unit Testing, Integration Testing
- DevOps:** Docker, CI/CD Pipelines, GitHub Actions, Linux
- Practices:** Agile, Code Reviews, Debugging, Production Support

EXPERIENCE

- Hindustan Aeronautics Limited (HAL)**
Data Analyst Intern
 - Backend Optimization:** Optimized SQL queries and backend workflows improving execution time by 30%.
 - Automation:** Built Python ETL pipelines processing 10K+ records.
 - Debugging:** Resolved data inconsistencies through backend audits.
 - RPSG Ventures Limited**
Full-Stack Intern
 - API Development:** Developed REST APIs using Django and Flask.
 - Authentication:** Implemented role-based secure login systems.
 - CI/CD:** Containerized services and integrated CI workflows.
- Kolkata, India
Sep 2023 – Oct 2023

Kolkata, India
Nov 2023 – Dec 2023

PROJECTS

- Microservices-Based Backend Platform:** Designed Flask-based microservices with Docker and Kafka-based communication.
- Brain Tumor Detection System:** Built CNN-based MRI classifier achieving 92% accuracy with Flask deployment.
- Multiple Disease Prediction System:** Developed Django backend with REST APIs and automated testing using pytest.
- GitHub Profile Analytics API:** Built Flask API to analyze GitHub repositories and activity metrics.

CERTIFICATIONS

- Professional Certificate:** IBM Data Analyst - Coursera (2026)
- Professional Certificate:** Complete Full-Stack Web Development Bootcamp – Udemy (2025)
- Professional Certificate:** R&D Head, IEEE Computer Society – VIT (2024)
